I will try to be brief although I find it difficult because of the subject. In simple terms I am a surgeon who drives about 27 miles to work each day (I work in the Bronx). Previous to XM instant traffic I used FM and AM stations and even used the internet on a PDA - NONE of them provided me with the necessary information to help with traffic and congestion the way XM does. It is impossible to believe that I have to write this kind of note to inform what should be a well informed public servant organization that the NAB is ONLY worried about their pocketbook - what is wrong with you - although I probably can guess that it is related to the \$\$\$ they donate to Washington. What possible justification can you offer to support their petition 04-160. I will tell you that if you use XM instant weather on a twice daily basis as do I and had previously used FM and AM stations you would not even blink at their \$\$\$ and would JUST SAY NO. Thank for listening to the frustrations of an old surgeon.
